==> Deleted Installed Casks
unofficial-wineskin ✖

You have 13 outdated formulae installed.

==> Caveats
sqlitestudio is built for Intel macOS and so requires Rosetta 2 to be installed.
You can install Rosetta 2 with:
  softwareupdate --install-rosetta --agree-to-license
Note that it is very difficult to remove Rosetta 2 once it is installed.

==> Downloading https://github.com/pawelsalawa/sqlitestudio/releases/download/3.4.10/sqlitestudio-3.4.10.dmg
